## PREFATORY NOTE.

---

The *Hand-Gazetteer of India* is based on the Index to Constable's *Hand-Atlas of India* which contains nearly 12,000 place-names, and includes all mentioned in the Imperial Gazetteer of India. To these have been added very largely from the Provincial Gazetteers, the Census Reports (1891), and the Postal Directories. The additions from all sources bring the number of entries to close upon 20,000.

Though the details are necessarily of the briefest nature, they indicate the position of each place, and the populations of districts, towns, and villages so far as available. The work is designed as a much needed general reference book to the topography of India, embodying the substance of many extensive works in one handy volume. It is thus adapted as a companion to the *Hand-Atlas*, and to every good map of India.

The question of spelling is still a difficulty with Indian place-names, and the general principles of the system followed in the Imperial Gazetteer have been adopted, whilst the spellings approved by Government have been usually given. Long vowels are generally indicated, but as these are not marked in Government publications, the marks are not always repeated.

Area of native states, 9609 sq. m. P. 3,700,622. Iron and gold are worked, and coal of poor quality has been found. Madras is not naturally a fertile area, and except along the Malabar coast, the rainfall is not to be depended upon; besides the natural features of the country prevent more than about 20 per cent of the land to be irrigated. Principal crops: food grains, oilseeds, garden produce, cotton, and indigo. Coffee, tea and tobacco are also staple products. Large public works of various kinds have been carried out of late years. The manufactures are neither very numerous nor important.

**Madras**, (Madrāṣ), cap. and rly. terminus, Chengalpāt dist., Madras. In importance, ranks third among the ports of India, though the roadstead is open and exposed. Trade in coffee, cotton, grain, hides, indigo, oil-seeds, dyes, sugar, horns, iron etc. Seat of a University, and contains an observatory, museum, libraries, hospitals, schools and colleges. Mean temperature from  $74^{\circ}$  to  $87^{\circ} F.$  Mean annual rainfall, 48.69 in.  $13^{\circ} 4' 6'' N.$ ,  $80^{\circ} 17' 21'' E.$  (as used by the Survey Department: electric determination.  $80^{\circ} 14' 50''$ ).
